Reasons for Allowance

Allowable Subject Matter

- 1. Claims 1-16 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a video display controller providing correction when a bus overload/memory underflow condition occurs. Each independent claim identifies the uniquely distinct features "a display data generator connected to the data converter for receiving the converted data and generating temporary display data therefrom using a predefined algorithm", "a holding register connected to the display data generator for storing the generated temporary display data" and "a multiplexer connected to the data converter for receiving the converted data and the holding register for receiving the generated temporary display data, wherein the multiplexer selects and outputs one of the converted data and the generated temporary display data in accordance with a bus overload signal that indicates a predetermined condition of the external bus". The closest prior art, Dierke (USPN: 5850572), Schnizlein et al. (USPN: 6075831), Jeong et al. (USPN: 6229859), and Swan (USPN: 6304297) disclose methods of assuring a memory buffer does not underflow/overflow including inserting temporary data such as null values into the data stream, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number: 10/613,898 Page 3

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven E. Holton whose telephone number is (571) 272-7903. The examiner can normally be reached on M-F 8:30-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala can be reached on (571) 272-7681. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
